

For Learn, staff have the option of two different assignment tools that can be used for submission, marking and returning grades. The Learn assignment tools and the Turnitin Suite are similar but not identical in their functionality.

This note aims to help staff decide between the two services. This is **not** a complete list of all the functions, but compares key options so that staff can decide which tool offers the functionality they need.

### Originality Check

If an assignment requires originality reports we would advise staff to use the Turnitin Suite as this is the only tool that has this functionality.

### Key Features Comparison Grid

	Learn Assignment	Turnitin Assignment
Originality Report (text checking)		✓
Draft submission	✓	✓
Accept any file type	✓	✓
Single and Multiple Submissions	✓	✓
